

**In The Claims:**

Please replace the previously presented claim set with the following replacement claim set:

1-16 (Cancelled)

17. (Currently Amended) An article comprising:

- (i) a continuous, opaque layer of metal;
- (ii) a polyurethane substrate on an outer surface of the layer of metal; and
- (iii) at least one component on an outer surface of the polyurethane substrate opposite the layer of metal, wherein the at least one component comprises a printed message, a decorative pattern, a color layer, a polyurethane clear coat protective layer, or a combination thereof, and wherein at least part of said layer of metal is visible through said polyurethane substrate and said at least one component.

18. (Previously Presented) The article of claim 17, wherein said metal is selected from tin, chromium, nickel, stainless steel, copper, aluminum, indium, gold, silver, or alloys thereof.

19. (Previously Presented) The article of claim 17, wherein said metal is indium or an alloy thereof.

20. (Previously Presented) The article of claim 17, wherein said metal is tin or an alloy thereof.

21. (Currently Amended) The article of claim 17, wherein said polyurethane substrate includes a crosslinking agent..

22. (Previously Presented) The article of claim 17, further comprising a primer layer on said layer of metal for improving adhesion to said layer of metal.

Amendment And Response  
Serial No. 10/655,331

23. (Previously Presented) The article of claim 17, wherein said metal is in direct contact with said polyurethane substrate.

24. (Previously Presented) The article of claim 17, wherein said polyurethane substrate includes colorants for providing a colored or tinted appearance to said polyurethane substrate.

25-26. (Cancelled)

27. (Currently Amended) An article comprising:

- (i) a continuous, opaque layer of metal;
- (ii) a polyurethane substrate on a surface of said layer of metal; and
- (iii) at least one backing on a surface of said layer of metal opposite said polyurethane substrate, said backing comprising ~~an attachment system, a reinforcement material, or a combination thereof a pressure-sensitive adhesive foam tape.~~

28. (Currently Amended) The article of claim 27, wherein said ~~attachment system~~ ~~backing~~ ~~further~~ comprises a ~~pressure-sensitive adhesive foam tape~~ ~~reinforcement material~~.

29. (Cancelled)

30. (Currently Amended) The article of claim ~~28~~ ~~27~~, wherein said metal is selected from the group consisting of tin, chromium, nickel, stainless steel, copper, aluminum, indium, gold, silver, and alloys thereof.

31. (Previously Presented) The article of claim 27, wherein said polyurethane substrate is transparent such that the layer of metal is viewable through the polyurethane substrate.

32. (Previously Presented) The article of claim 27, further comprising at least one component on an outer surface of the polyurethane substrate opposite the layer of metal, wherein the at least one

component comprises a printed message, a decorative pattern, a color layer, a clear coat protective layer, or a combination thereof and wherein at least part of said layer of metal is visible through said polyurethane substrate and through said at least one component.

33. (Currently Amended) The article of claim 32, wherein the at least one component comprises said a clear coat protective layer.

34. (Currently Amended) The article of claim 32 33, wherein the at least one component comprises ~~said clear coat protective layer is an outer layer of the article~~ a printed message, a decorative pattern, a color layer, or a combination thereof.

35. (Currently Amended) An article comprising:

- (i) a continuous, opaque layer of metal;
- (ii) a polyurethane substrate on an outer surface of the layer of metal;
- (iii) at least one component on an outer surface of the polyurethane substrate opposite the layer of metal, wherein the at least one component comprises a printed message, a decorative pattern, a color layer, a polyurethane clear coat protective layer, or a combination thereof and wherein at least part of said layer of metal is visible through said polyurethane substrate and said at least one component; and
- (iv) at least one backing on a surface of said layer of metal opposite said polyurethane substrate, said backing comprising an attachment system, a reinforcement material, or a combination thereof.

36. (Previously Presented) The article of claim 35 further comprising a base substrate.

37. (New) The article of claim 17, wherein the polyurethane substrate is derived from an aqueous urethane dispersion, and when present, the polyurethane clear coat protective layer comprising a solvent-based polyurethane clear coat protective layer.

Amendment And Response  
Serial No. 10/655,331

38. (New) The article of claim 27, wherein the polyurethane substrate is derived from an aqueous urethane dispersion.

39. (New) The article of claim 35, wherein the polyurethane substrate is derived from an aqueous urethane dispersion, and when present, the polyurethane clear coat protective layer comprising a solvent-based polyurethane clear coat protective layer.
